The contents listed below are not accessible for the following reasons.

- 1.1.1 – Some non-textual content presented to you do not have an equivalent textual alternative that serves the same purpose;
- 1.3.1 – In some cases, information, structure or correlations conveyed by the presentation of pages cannot be determined programmatically (or are not available through text);
- 1.4.1 – In some cases, color alone has been used to identify a purpose or distinguish an information or function;
- 1.4.3 – Where not allowed, visual representation of text and images containing text does not always have the minimum contrast ratio required;
- 1.4.11 – For some essential components, even in different states, the color contrast compared to adjacent elements does not exceed the ratio of 3:1;
- 2.1.1 – Some features cannot be activated by keyboard (or similar input interface);
- 2.2.2 – Some animations, flashing, sliding or self-updates of information started automatically, with a duration of more than five seconds or presented in parallel with other content, there are no mechanisms to stop or hide them;
- 2.4.2 – Some web pages do not have titles that describe the topic or purpose;
- 2.4.3 – In some web pages that can be browsed sequentially and in which the navigation sequence affects their meaning and functioning, some objects that may receive the focus do not receive it with an order that preserves the meaning and operation of it;
- 2.4.6 – Headers and/or labels do not sufficiently clarify content or functionality;
- 2.4.7 – On some interactive elements the focus indicator is not visible;

- 2.5.3 – For some user interface components with labels that include text or text images, the name read by the a.t., does not contain the text that is visually presented;
- 3.3.2 – In some cases no labels or instructions are provided when the content requires input actions by the user;
- 4.1.2 – In some cases, user interface components (including: module elements, script-generated links and components), name, role, state, property and values are incorrect or set, or the user a.t. are not warned when these attributes change;
- 4.1.3 – In some cases state messages are not presented to the user so that a.t. interpret them without having to move the focus.
